

Minji Kang

Seoul, South Korea, minji.kang0408@gmail.com

Education

Kangwon National University

Chuncheon, Korea

B.S. in Computer Engineering

May 2017 to February 2021

- Current major: Computer Engineering
- Previous major: Political Science

May 2018 to February 2021
May 2017 to September 2017

Conference

Kim. Seongseop, etc. al 2021 Battery Lifetime Estimation System for IoT Devices using Voltage Measurement *2021 Korean Embedded Engineering Society Fall Conference*

Kang Minji, etc. al 2022 Analysis of EDLC-based Primary Battery Current Consumption Characteristics Considering Operation Patterns in IoT Devices *EEECS 2022; The 10th International Conference on Electronics, Electrical Engineering, Computer Science 2022*

Kang Minji, etc. al 2022 SOC ESTIMATION OF LITHIUM THIONYL CHLORIDE BATTERY USING VOLTAGE RECOVERY TIME IN IOT DEVICES *EEECS 2022; The 11th International Conference on Electronics, Electrical Engineering, Computer Science 2022*

Kang Minji, etc. al 2023 EFFICIENT BATTERY CAPACITY ESTIMATION METHOD BASED ON BATTERY STATUS FEEDBACK FOR IOT DEVICES *EEECS 2023; The 12th International Conference on Electronics, Electrical Engineering, Computer Science 2023*

Kang Minji, etc. al 2023 Primary Lithium Battery SOC Prediction System for Estimating Life-time of Industrial IoT Devices *2023 The Institute of Electrical Engineers of Korea Fall Conference*

Related Professional Experience

KETI, Korea Electronics Technology Institute

Seongnam, Korea

Research assistant with seungwoo lee professor

August 2021-August 2025

- Mainly analyzed and gathered data related to the project. And produced the experiment and developed the algorithm which is fitted to collected data.
- Developed an anomaly detection model from lots of machinery data and real time analysis visualization UI using Kubeflow.
- Developed an algorithm and a firmware that predicts the remaining capacity of the primary lithium battery for preventing the sudden discharge of equipment.
- Developed UI to visualize real time gas flow data using Grafana.

Kangwon National University

Chuncheon, Korea

Undergraduate research assistant with sang-ki ko professor

September 2020-April 2021

- Researched GPS-Video Fusion to synchronize video time with gps time using YOLOv5+DeepSORT, object detection algorithm. And suggested three methods, Hungarian algorithm, Vectorization frames, Kernel Density Estimation using Gaussian kernel.
- Attended a weekly co-lab seminar and analyzed some papers and presented them.

O2O

Seoul, Korea

Internship

July 2020-August 2020

- Developed own AoG program that recommends netflix series.
- Developed crossword game based on voice-recognition using Action on Google and Dialogflow.

Skills

- Programming languages: C, Python, Java, SQL
- Languages: Korean(native), English(basic)
- Other: Linux(Debian, Ubuntu), Mac OS, Windows OS

Selected Grants and Honors

Korea National Scholarship	2017-18
Special Scholarship	2017
Grade D scholarship for academic excellence	2017, 2019, 2020
University life support fund	2017
Chuncheon Fire Station Volunteer Firefighters' Children's Scholarship	2019
Yanggu Fire Station Volunteer Firefighters' Children's Scholarship	2019
SW Talent Scholarship	2019
SW Center University Business Group Scholarship	2019-20
Grade B scholarship for academic excellence	2019-20
On-site training support	2020
COVID-19 special scholarship	2020
Yangrok scholarship association	2020
Simultaneous enrollment scholarship	2020
Non-curricular mileage scholarship	2020
